

IRIS iConnect

Part of IRIS' Data Consumption Platform, IRIS iConnect is an MS[®]Excel[®] plugin to help analysts access and use publicly available structured data to search and analyze financial information on companies across industries and geographies, in a language of their choice.

iConnect is equipped with several easy-to-use features that allow analysts to take business-critical decisions without ever having to leave the familiar confines of their spreadsheet.

iConnect Features

In-depth Data

- Data available in reported and normalized forms
- Includes basic financials, footnotes, earnings data and ratios
- Normalized data can be used to compare across companies and/or geographies
- Normalization rules are made transparent for users to view and customize

Easy Modelling

- Flow data into existing user models
- Use predefined models or create custom models
- Create your own derived values and ratios for future analysis
- Create peer groups for easy comparison

Smart Links

- Trace data points back to the filed source document
- Navigate through linked document to see all instances where the same data point has been reported

Global Data

- Access data for multiple countries including U.S., India, Italy, Japan, Germany and U.A.E
- Compare global companies using normalized data

Multilingual Capability

- Analyze data in a language of your choice

About IRIS' Data Consumption Platform

The Data Consumption Platform (DCP), our Data-as-a-Service or DaaS offering, is a repository of structured data culled from XBRL filings submitted by companies to securities markets regulators and company registries. The data has been normalized to facilitate meaningful comparison of corporate performance across markets, industries and geographies.

We have leveraged our experience of working with structured data to build several applications for efficient consumption, analysis and dissemination of information. Some of these include:

- **iConnect** – an MS[®]Excel[®] plugin for easy analysis
- **Cleandata.com** – a web portal for data and analysis and
- **Automated Stories** – a story engine that churns out templated, textual content to power websites, public and investor relations and micro blogging.
- **Data APIs**

The sheer depth, speed and flexibility of data delivery with IRIS' DCP ensure that the user's focus is always on analysis rather than on the process of aggregating data.

About IRIS

IRIS Business Services Limited is a leading structured data solutions company with global presence in regulatory and compliance reporting software. The firm is uniquely positioned with offerings across the spectrum of creation, management and use of structured data in the realm of business and financial reporting.
